Amendments to the Claims:

This listing of claims will replace all prior versions, and listings, of claims in the application:

Listing of Claims:

1.   (Currently Amended) A communication terminal, comprising:

a contents reproducing unit ~~that~~configured to reproduces contents;

an incoming call processing unit ~~that~~configured to receive an incoming call and processes ~~an~~the incoming call;

a watching condition determining~~grasping~~ unit configured to determine~~that grasps~~ a watching condition of contents being reproduced; and

a control unit ~~that carries out~~configured to control the reproduction of the contents and the processing of the incoming call ~~in an incoming call processing mode corresponding to~~ based on the watching condition when the incoming call processing unit receives the incoming call during the reproduction of content.

2.   (Currently Amended) The communication terminal according to claim 1, further comprising:~~wherein the watching condition grasping unit includes:~~

a storage unit configured to~~which~~ stores a use history of the contents;~~and~~

wherein the watching condition determining unit is configured to determine ~~a grasping unit which grasps~~the watching condition based on the use history stored in the storage unit~~which is acquired by referring to the storage unit~~.

3.   (Currently Amended) The communication terminal according to claim 1, further comprising:~~wherein the watching condition grasping unit includes:~~

a storage unit configured to ~~which~~stores a watching time of the contents;~~and~~

wherein the watching condition determining unit is configured to ~~a grasping unit which grasps~~determine the watching condition based on the watching time stored in the storage unit~~which is acquired by referring to the storage unit.~~.

4.   (Canceled)

5.   (Currently Amended) The communication terminal according to claim 4~~4~~1, further comprising~~wherein the watching condition grasping unit includes:~~:

a detecting~~capturing~~ unit configured to ~~which detect~~captures a gazing time ~~an eye of~~ of the content~~a user watching the contents;~~; and

wherein the watching condition determining unit is configured to determine~~a grasping unit which grasps~~ the watching condition based on the~~a~~ gazing time ~~of the contents obtained from captured images~~.

6.   (Currently Amended) The communication terminal according to claim 1, wherein the control unit is ~~carries out~~configured to control ~~-~~the reproduction of the content and the processing of the incoming call so ~~as to~~that ~~continue~~ the reproduction of the contents continues and ~~provide~~ an automatic answer to the incoming call is provided.

7.   (Canceled)

8.   (Currently Amended) The communication terminal according to claim 1, wherein the control unit is configured to ~~carries out~~control the reproduction of the content and the processing of the incoming call so ~~as to continue~~that the reproduction of the contents continues and ~~notify the user~~a notification of the incoming call is produced during the reproduction of the contents.

9.   (Currently Amended) The communication terminal according to claim 1, wherein the control unit is ~~carries out~~configured to control the reproduction of the content and the processing of the incoming call so ~~as to continue~~ that the reproduction of the contents continues and a notification~~notify the user~~ of the incoming call is produced after termination of the reproduction of the contents.

3

10.   (Currently Amended) The communication terminal according to claim 1, wherein the control unit is ~~carries out~~configured to control the reproduction of the content and the processing of the incoming call so ~~as to suspend~~that the reproduction of the contents is suspended and ~~notify the user~~a notification of the incoming call is produced after suspension of the reproduction of the contents.

11.   (Canceled)
